

NICOLAAS LABUSCHAGNE

Raleigh, NC • (919) 402-3802 • znj.labuschagne@gmail.com

PROFESSIONAL SUMMARY

Results-driven full-stack developer with 3+ years of experience in digital transformation and business workflow automation. Proven track record of slashing operational timelines by 90% — from 6 months to 12 days — through custom Python and C# tooling. Adept at building secure, user-centric applications with a focus on high-impact efficiency, and efficient data management across large datasets.

TECHNICAL SKILLS

Languages: Java, C#, JavaScript, TypeScript, Python, HTML5, CSS3

Frameworks & Tools: .NET, Node.js, Angular, React, REST APIs, Git

Databases: MySQL, MongoDB, Microsoft SQL Server, Supabase

PROFESSIONAL EXPERIENCE

Estate Recoveries | Software Developer

Jan 2023 – Present

South Africa (Remote)

- Reduced estate recovery timelines by 90% (from 6 months to 12 days) by engineering custom Python and C# automation tools.
- Optimized executive search queries against a 400,000+ record database, cutting lookup times from several weeks to under 5 seconds.
- Maintained data integrity across production systems and led technical demonstrations for senior business stakeholders.
- Analyzed system performance metrics to identify bottlenecks, delivering targeted optimizations that measurably improved application throughput.
- Strengthened code quality through proactive bug identification and resolution prior to product deployment.

Self-Employed | Freelance Full-Stack Developer

2022 – Present

- Architected and delivered a full-stack IT Ticketing System featuring role-based access control (RBAC), comprehensive audit trails, and a Draggable.js drag-and-drop UI.
- Grew client base 4x by modernizing paper-based business workflows into SEO-optimized, responsive web applications.
- Produced and maintained thorough technical documentation covering system architecture, development processes, and deployment procedures.
- Diagnosed and resolved production issues rapidly, minimizing downtime and preserving a high level of user satisfaction.

Frame Production | Junior Manager & Web Developer

2021 – 2022

- Supervised daily team operations and logistics while managing and maintaining the company's web presence.
- Gained end-to-end product lifecycle experience, shepherding projects from initial design through final delivery.
- Implemented workflow process improvements that increased production efficiency and reduced overhead costs.
- Partnered with cross-functional teams to streamline communication channels and accelerate project execution.

EDUCATION

Academic Institute of Excellence

January 2023

Certificate in Full-Stack Web & Software Development
